How Hackers are Stealing Data for Financial Gains
in the 21st Century"*****Presented by Jibran Ilyas*****Saturday, April 11, 2009****12:40 pm – 1:10 pm**

Technological Institute

2145 Sheridan Road, Evanston, IL

3rd floor, Room M345

Biographical Information

Jibran Ilyas is a Senior Forensic Investigator at Trustwave's SpiderLabs, the advanced security team within Trustwave focused on Forensics, Ethical Hacking, and Application Security testing for premier clients. He has investigated some of nation's largest data breaches and is a regular contributor for Visa's published security alerts through his whitepapers. In his past roles, he has been involved in Intrusion Detection Systems and Firewall deployments for Fortune 500 companies. His research interests include reverse engineering and anti-forensics. He is currently a member of MSIT Class of 2009.

Synopsis

The hacking culture has seen a significant shift in the last few years. Hackers who once compromised systems for vandalism and glory are now hacking for profit. This talk will cover the latest (successful) hacking techniques that hackers are using to steal credit cards from systems be it a Point of Sale Terminal or a "secure" E-Commerce Webserver. The presentation will also offer guidance on how to protect against the current and future threats for your organizations.
